## HORSE HEALTH IN STABLE HANDS

AVAILABLE NOW

A STABLE-SIDE DEVICE TO  
MONITOR INFLAMMATION.

The Randox VeraSTAT-V detects the earliest signs of inflammation in horse blood.

Serum Amyloid A (SAA) is the fastest blood marker to rise in response to injury or infection making it a valuable tool for detection, health status and response to treatment.

# RANDOX

The VeraSTAT-V device measures quantitative levels of SAA helping to distinguish systemic infection from injury prone inflammation.

Accurate results help to make informed decisions about the best treatment plan.

## SCREEN, DETECT, PROTECT

---

Real-time equine health monitoring from the convenience of the stable yard, benefits horse, trainer and owner.

Treatments can start immediately, recovery periods can be shorter, and the horse can return to work sooner.

### Equine Uses:

- Health & performance review
- Immediate alert if there is inflammation
- Monitoring treatment success
