

A-FABP		Human, Recombinant, <i>E. coli</i>	
Cat. No.:	RCP9333 RCP9334 RCP9335	Size:	10μg 100μg 1000μg

- Synonym: Fatty Acid Binding Protein, Adipocyte; FABP-4; Adipocyte lipid-binding protein; A-FABP; ALBP; Adipocyte Bindng Protein AP2.
- **Description:** Fatty acid binding proteins are a family of small, highly conserved, cytoplasmic proteins (14-15kDa) that bind long chain fatty acids, their CoA derivatives, billirubin, organic anions and other small hydrophobic molecules. A-FABP (or FABP-4) is a fat cell specific protein that is considered to facilitate the bidirectional flux of fatty acids into and out of the adipocyte in response to insulin and epinephrine.

RANDOX recombinant A-FABP comprises a 132 amino acid fragment (1-132) corresponding to the human adipocyte FABP protein and is expressed in E. coli with an aminoterminal hexahistidine tag. This product is for research use only and is not intended for diagnostic or therapeutic use.
