

Anti- Cytomegalovirus (CMV) gB Recombinant Antibody Fragments

Target: Anti- Cytomegalovirus (CMV) gB

Clone name: CMV2

Catalogue Number: RAF9795

Description: Recombinant single-chain variable fragment (scFv)¹ obtained from

Sheep and expressed in an E. Coli to bind against human

Cytomegalovirus (CMV) gB antigen.

Activity/ Specificity: Tested positive against human CMV antigen. Cross-reactivity checked

against a panel of known cross-reactants and non-specific antigens.

Applications: These fragments contain His and c-Myc fusion tags which may be used

for detection or immobilisation.² Recombinant antibody fragments are suitable for use in ELISA immunoassays, biosensor applications, western blots, immunohistochemistry, flow cytometry, immunoaffinity

purification and most other immunological methods*.

Size: Approximately 35 kDa

Quantity: 1 mg

Concentration: Typically >1mg/ml

Purity: >90% assessed by SDS-PAGE.

Storage: These fragments are stable at 4°C. It is recommended that for storage

over extended periods they are kept at -20°C and should not be subject

to repeated freeze-thaw cycles.

Buffer: 1x PBS containing 0.09% sodium azide preservative.

Dilution Factor: To be determined by end-user.
